

Keeping your boiler cupboard clear

We know that your boiler cupboard seems like a convenient place to store things and keep it out of the way, but this is the wrong thing to do. This cupboard needs to be kept clear at all times for the following reasons:

- **Fire Safety**
Should anything go wrong with the electrics in your hot water tank cupboard, then any material inside the cupboard could be cause a fire.
- **Damage to the Hot Water Tank**
Having items crammed into the cupboard can cause damage to the hot water tank, it could damage some of the wiring or one of the pipes carrying the water.
- **Poor Performance**
Keeping the hot water tank well ventilated is important, keeping lot of things in the cupboard can cause an inferior performance.
- **Cause delays to repairs**
Should we need to carry out repairs, having the cupboard full of items will delay us form fixing it.

In short, it really is in the best interests for you and us that the cupboard is always kept clear of anything.
